Coolant Exchanger

- Our 10-minute exchange process means no more waiting for the engine to warm up!
- Our "engine off" feature removes pulleys, belts, and fan blades from the safety equation.
- Leak check feature allows the technician to test for leaks prior to refilling.
- Two clearly marked valves and an easy-to-read gauge make this machine very easy to use.
- No electricity required. 90 psi shop air drives the exchange process, as well as the 2 gpm pump on the waste tank.
- Two external new coolant supply tanks allow onboard storage of two different coolant types.

No. 75700 – Coolant Exchanger.
