

Fuel Injector Storage Rack with Protective Cups

6752, 6753

When replacing or servicing fuel injection components, you'll appreciate having this tool! OTC now offers a handy fuel injector storage rack with protective cups. New from OTC, part number 6752 is an injector storage rack, designed to hold up to 8 injectors. Each injector can be placed in the protecting cup at the vehicle, then transferred to the storage rack.

Professional technicians understand the value of having a tool to protect these components due to the precision machining, the component cost and the mess they can leave on your workbench. Designed for the diesel truck market, this tool will work for just about any injector you need to remove for service or replacement.

The simple design of this storage rack works anywhere. Each compartment is marked to help keep the injectors organized by the cylinder they came from in order to keep the injector calibration in sync with the vehicles ECM. The protective cups ensure injector tips are not damaged or contaminated and catch oil, fuel and grime and keep your workspace clean. A set of 8 replacement cups are available by ordering part number 6753.

No. 6752 – Fuel injector storage rack with protective cups. Compartment are marked to help keep the injectors organized by the cylinder they came from in order to keep the injector calibration in sync with the vehicles ECM.
