

## Contaminated Refrigerant Recovery Machine

### Meets all requirements of SAE J2851

The Robinair 25700 is a contaminated recovery only device that is designed to remove contaminated refrigerant from vehicles that are equipped with R-1234yf and R-134a A/C systems.

# Industry-leading efficiency and more accurate service

## Features

Durable, compact, portable design allows user to recover contaminated refrigerant easily at the vehicle

Low side hoses for R-1234yf and R-134a A/C systems

80% tank full shut off safety harness prevents overfilling recovery tank

Proprietary oil-less compressor is capable of handling both liquid and vapor refrigerant

Self-purge function effectively removes any remaining refrigerant from the machine

A high pressure shut-off switch turns the machine off automatically if the pressure rises above 435 PSI to protect the equipment

Inlet filter screen stops debris from getting inside of the machine

## Specifications

Operating voltage - 103-127V, 60Hz AC

2-1/2" High and low pressure gauges

1/2 HP Motor

Weight 32 lbs

Dimensions 13" x 9" x 19"

Meets all requirements of SAE J2851

Contaminated Recovery only device
