

PULLERS FORGED IN USA

1676 Strong Box Puller Set

- Includes eight pullers, five attachments and extra puller jaws for most jobs
- Pull gears, flywheels, steering wheels, pitman arms, bearings and more
- Metal storage box keeps pullers organized and accessible

1123 Bearing Splitter

- Separates components when used with 1035, 1036, 1037, 1038 and 927 pullers
- Puller legs thread into splitter to pull something off a shaft or pulling a shaft out of something
- Used when pulling gears, bearings, wheels, pulleys, transmission shafts and more

1038 7-ton Grip-O-Matic Puller

- Can be used as 2-jaw or 3-jaw puller with 4-way cross-block
- Works with bearing splitters or directly on component
- Impact sturdy for use in hundreds of pulling jobs

938 17-1/2 Ton Push-Puller

- Remove and install press-fit parts with authority
- For use with bearing splitters, pulley splitters and internal pulling attachments
- 11-1/2" max reach with spread range of 3-1/8" to 11-3/4"

1035 7-ton Grip-O-Matic Puller

- Short-reach 2-jaw puller for limited-space jobs
- Reversible jaws for internal pulling use
- 5" max reach with 9" max spread

1036 7-ton Grip-O-Matic Puller

- Extended-reach 2-jaw puller for bigger jobs
- 8-3/4" max reach with max spread of 9-1/2"
- 3-position adjustable jaws add versatility
